

HIKRA® PlusXL (PV1-F)

This cable is intended for use in PV installations e.g. acc. IEC 60364-7-712 and suitable for the application in/at equipment with protective insulation (protection class II). Our double insulated HIKRA® PlusXL Solar cable is intended for permanent use outdoor and indoor, for free movable, free hanging and fixed installation. Robust materials defy the long-term influences of nature and offer a maximum quality and safety.

Thanks to its good resistance to atmospheric conditions, the cable has a specifically water repellency and can be laid directly underground.

Approvals:
